

In the claims:

Claims 1-12 Cancelled

13. (Currently amended) A volatile dispensing system, comprising:

at least one container having a volatile,
a holder retaining said at least one container,

and

an RFID tag on said at least one container and a reader on said holder controlling dispensing of said volatile.

14. (Original) The system of claim 13, wherein said volatile is a air freshener.

15. (Original) The system of claim 13, wherein said volatile is a fragrance.

16. (Original) The system of claim 13, wherein said at least one container is a plurality of containers, each container having an RFID tag, and further comprising a controller, said controller controlling which one of said plurality of containers is dispensed.

17. (Currently amended) The system of claim 13, wherein said holder is a heater, ~~said RFID tag is connected to said at least one container,~~ and said RFID tag controls dispensing by initiating heating of said at least one container.

18. (Original) The system of claim 17, wherein said RFID tag controls dispensing by communicating heating instructions to said heater.

Claims 19-21 Cancelled

22. (New) A volatile dispensing system, comprising:
at least one container having a volatile,
a holder releasably retaining said at least one
container, and

an RFID tag on said at least one container
controlling dispensing of said volatile.

23. (New) The system of claim 22, wherein said RFID tag
stores the usage history of said at least one container.

24. (New) The system of claim 22, wherein said holder
is a heater and said RFID tag stores heating regimen information
for said at least one container.
